SKILLS

Python

C

Web Design

Hadoop

Microsoft Excel

Microsoft Word

OBJECTIVE

A data scientist is a professional who collects, analyzes, and interprets large datasets to extract valuable insights. They use programming languages like Python or R, along with statistical methods and machine learning algorithms, to build predictive models and solve complex problems. Data scientists also clean and preprocess data to ensure accuracy and reliability.

EXPERIENCE

25.12.2024 - 31.12.2024	**INTERNSHIP** Scion Research and Development ,Thanjavur

EDUCATION

2023 -2026	**Bachelor of Science in Data Science** Bharathidasan University

PROJECTS

3D and 4D animation

3D animation creates moving images in a three-dimensional space, while 4D animation, though not a widely used term in the animation industry, could potentially refer to 3D animation with an added time dimension, or a more immersive experience with time as a factor.

CERTIFICATES

Certificates ☆ MongoDB ☆ Infosys - Cloud computing (Intermediate) ☆ IBM Tata☆ Dipolomo in Computer Application
